ONCE YOU KNOW, YOU CAN'T GO BACK

The United States has not passed a major federal law governing cosmetics safety since 1938. (Ahem—that's over 83 years ago.) The European Union has banned or restricted 1,400 ingredients from personal-care products. The United States has banned or restricted only 30. **We're working to change that.**

ALL ABOUT REGIMENS

The products in our four-step regimens work in synergy to deliver the best results possible.

*Great skin and safer standards?
IT'S AS EASY AS 1, 2, 3, 4.*

Cleansing and thoroughly removing makeup is essential. Our cleansers effectively cleanse your skin without harsh surfactants.

2. PREP

COUNTERSUN

All of the cover. None of the concern. Shield skin from the sun's damaging UVA and UVB rays with our versatile mineral sunscreens.

#CLEANFACT

We don't use oxybenzone or octinoxate in our sunscreens because they are shown to harm coral reefs.

SUN 101

UVA rays (a.k.a. the sun's aging rays) can penetrate glass and clouds and are the main cause of free-radical damage that contributes to premature aging. **UVB rays (a.k.a. the sun's burning rays)** are the primary cause of sunburn and are the most commonly recognized indicator of skin damage. Good news: Countersun blocks both.

KEY INGREDIENT

Instead of using potentially irritating chemical filters, we use non-nano zinc oxide—a safer mineral blocker that sits on the surface of skin and bounces sun's rays away.
